Market Analysis & Industry Problems

As per the market analysis consumers are getting overdose of irrelevant or impractical promotions, which are ignored by them more often. At present, the young generation across the globe is social and aspirational. They are avid consumers of promotions. In fact, most of the people across the globe, seek discounts and promotions on a regular basis. Current online promotions presented to them, however, are often irrelevant or with little or no significance to the consumer demographics, preferences and consumer location. Clearly, Data Science and location based services(LBS) will become requisite for proper Marketing Operations in this environment. Lately companies across the globe observed significant raise in online business and online implementation of sales strategies.

Merchants are beset with significant increase in the cost of Mobile Marketing, a problem that increases as the larger social network platforms and messaging platforms emerged in a short span of time.

Many countries have been trying to balance and manage their economies by introducing new policies and printing new currency which in turn has led to increase inflation and devaluation of fiat currencies.

This situation has attracted the attention of the entire world towards digital currencies.

Solution by BPT Platform

Crypto market and crypto currency uses are expected to grow by more than 1200% in a couple of years. While these trends continue gaining momentum, digitalization is surely going to have a global impact. The new laws developed by the nations are expected to make digital currencies easier to handle. Corporations and large investment funds will undoubtedly continue to enter the market. Today, both government agencies and banking structures are expressing interest in crypto currencies. For example, Swiss regulator FINMA approved the creation of the first crypto currency fund operating in the domestic market in late September, and the U.S. state of Wyoming is about to launch a crypto bank based on the Kraken system.

BPT Platform is providing a dedicated ecosystem and basic framework for the use of Blue Pearl Token in various day to day activities. Blue Pearl Token will be used in E-Commerce Site, Social media Platforms, OTT Platforms, gaming platforms, Crypto exchanges and Blockchains. Hence, making it quite convenient for people to explore all these possibilities across the globe without much hassle . With the easy use of Blue Pearl Token, BPT Platform will make it extremely convenient to buy products and to avail services for merchants as well as common people.
